# BURPEE'S SEEDS

FOR

## The Southern Planter

**SUMMER AND FALL, 1923**

BURPEE'S  
WAYAHEAD  
LETTUCE

EVERY planter, large or small, realizes the value of quality in seeds. Our extensive operations as seed growers have given us a unique opportunity to grow each variety of Burpee's Seeds where it will mature most nearly to perfection. Planters all over the world are buying Burpee Quality Seeds because they are assured of getting the **Best Seeds That Grow**.

This special folder contains a limited list of varieties which are extensively planted throughout the South. All the seed offered is of the usual high Burpee Quality.

**W. Atlee Burpee Co.**

**Seed Growers**

**Philadelphia**

# BURPEE'S SEEDS GROW

**BEETS** The uniformity in size, shape, color and growth of our beets is due to the very careful work of stock-seed selection. We know from our yearly comparative tests made on Burpee's Fordhook Farms in Pennsylvania that there are no better stocks of garden beets in existence. Sow one ounce for 100 feet of drill; 4 to 6 pounds per acre in drills.

	4 ozs.	Lb.	10 lbs.
107 Burpee's Extra-Early . . . . .	\$0.30	\$0.90	\$8.50

128 Burpee's Improved Blood Turnip . . . . .	.30	1.00	9.50

**CABBAGE** This is a great specialty with us, and our ever-increasing sales to Market Growers all over the country are a pleasing tribute to the quality of our stocks. Our Danish grown stock of Copenhagen Market can be particularly recommended for its uniformity, earliness, and extremely high yield. The varieties Danish Ballhead and Danish Roundhead, which have gained great popularity as winter keepers, are also grown in Denmark specially for us. One ounce will produce about 2,000 plants. Sow one ounce to 300 feet of drill. Two ounces sown in the hotbed will give sufficient plants to set out one acre.

226 Half-Long Scarlet Nantes . . . . .	.30	.85	8.00
229 Improved Long Orange . . . . .	.30	.85	8.00

**CAULIFLOWER** This is considered one of the finest vegetables we have, and it is very important for any grower to start with the very best strains obtainable. Burpee's cauliflower seed has proven to produce plants of uniform size and character, which will mature evenly and form a thick heavy curd of flowers. Sow one ounce for 300 feet of drill. Three ounces sown in the frame will give sufficient plants to set out one acre.

	Oz.	4 ozs.	Lb.
244 Burpee's Best-Early (¼ oz., 55¢) . . . . .	\$2.00	\$6.00	\$20.00
245 Burpee's Dry-Weather (¼ oz., 55¢) . . . . .	2.00	6.00	20.00
246 Burpee's Fordhook (¼ oz., 80¢) . . . . .	3.00	9.00	30.00

258 Veitch's Autumn Giant . . . . .	.45	1.35	4.50

**CELERY** At almost any time of the year there is a good demand for well-grown celery, but in order to be successful only the very best strains of seeds should be sown. If you sow Burpee's celery seed you are making sure of success. For an early crop our special strain of French-grown Golden Self-Blanching has for years been used by a large number of leading celery-growers who have written us that our strain has given them better results than any other strains they had tried. White Plume is another fine early variety which will have to be sold as soon as the stalks have matured. For winter use there is no finer celery in existence than Burpee's Fordhook. Burpee's Fordhook makes thick, heavy stalks of a particularly fine, nutty flavor. The stalks will keep in fine condition all through the winter. There is no other celery that can compare with Burpee's Fordhook in quality. One ounce is sufficient for 600 feet of drill. One ounce sown in the seed-flat gives 8,000 to 10,000 plants. Start 2 ounces in the frame for setting out one acre.

	Oz.	4 ozs.	Lb.
260 Golden Self-Blanching (American) . . . . .	\$0.50	\$1.50	\$5.00
262 Golden Self-Blanching (French-grown Seed) . . . . .	1.00	3.00	10.00
266 White Plume . . . . .	.30	.85	2.75
267 Easy Blanching . . . . .	.25	.75	2.50

# BURPEE'S SEEDS GROW

**EGG PLANT** We have been selecting our strains of Egg Plants on Burpee's Sunnybrook Farm in Gloucester County, New Jersey, where soil and weather conditions combine to produce egg plant seed of high germination and excellent quality. The commercial growers of egg plants will be delighted with the quality of our strains. One ounce will give 1,000 to 1,500 plants. Sow 4 ounces for planting one acre.

	Oz.	4 ozs.	Lb.	10 lbs.
420 Burpee's Black Beauty.....	.045	\$1.35	\$4.50	
422 New York Improved Spineless.....	.45	1.30	4.35	
423 Florida Highbush.....	.40	1.20	4.00	

**ENDIVE** Endive is now extensively grown and brings a good price all during the fall, winter, and early spring. We can recommend our stocks because they make large, well-rounded plants which remain in prime condition for marketing for an exceptionally long time. Sow one ounce for 500 feet of drill.

	4 ozs.	Lb.	10 lbs.
430 Green Curled or Giant Fringed Oyster	\$0.35	\$1.10	\$10.50
432 White Curled.....	.30	.85	8.00
436 Broad-Leaved Batavian (Escarolle)	.40	1.25	12.00

**KALE** No other hardy green is as easily grown as Kale. Kale is said to have a better flavor after the leaves have been frosted. The leaves can be cut off when not more than 6 inches in length, but usually the plants are grown on until the leaves are considerably larger. Sow one ounce for 500 feet of drill.

	Oz.	4 ozs.	Lb.	10 lbs.
446 Dwarf Green Curled.....	\$0.12	\$0.25	\$0.75	\$7.00
448 Dwarf Siberian.....	.12	.30	.85	8.00
452 Tall Green Curled Scotch.....	.12	.30	.85	8.00

**LETTUCE** Quality lettuce always brings a good price on the market. But it is useless to sow anything but the very best seed that is obtainable. Our extensive relations with Market Growers have taught us all the good points of superior lettuce for market, and we are convinced that Growers will be delighted with the strains we are offering. Sow one ounce for 600 feet of drill; 4 pounds per acre in drills.

655 Southern Giant Curled.....	.25	.70	6.50

Little  
Marvel  
Pea

**PEAS** Tremendous strides have been made within recent years in the quality of peas. The most careful stock seed selection has given us strains which are uniform in height, size, shape of pods, and date of maturity. Of all peas, Burpee's Blue Bantam, which is of dwarf habit, growing not more than 15 inches in height, is conceded the very sweetest. One pound of seed will sow 120 feet of single row. Sow in drills 100 to 150 pounds per acre.

	Lb.	100 lbs.
730 Market Surprise.....	\$0.25	\$22.00
731 Burpee's Best Extra-Early.....	.20	17.00

# BURPEE'S SEEDS are THE BEST SEEDS THAT GROW

Early Red, or Purple  
Top Strap-Leaved  
Turnip

## TURNIPS

Turnips delight in cool, moist fall weather. They are grown extensively throughout the country for market as well as for stock-feeding. The flat varieties mature the quickest. The variety Seven-Top does not produce any roots but an enormous amount of tender leaves which are a favorite "green" throughout the South. One ounce will sow 400 feet of drill. Sow 1 to 2 pounds per acre in drills; 3 to 5 pounds per acre broadcast.

**4 ozs. Lb. 10 lbs.**

1155 Early White Flat Dutch, Strap-L.	\$0.25	\$0.70	\$6.50
1157 Early Red, or Purple-Top Strap-L.	.25	.70	6.50
1159 Extra-Early White Milan	.40	1.20	11.50
1161 Extra-Early Purple-Top Milan	.40	1.20	11.50
1163 Red, or Purple-Top White Globe	.25	.75	7.00
1167 Large White Globe, Strap-Leaved	.25	.70	6.50
1169 White Egg	.25	.75	7.00
1173 Cowhorn, or Long White	.20	.65	6.00
1177 Seven-Top	.20	.60	5.50
1179 Large Yellow, or Amber Globe	.20	.65	6.00
1183 Golden Ball, or Orange Jelly	.25	.75	7.00
1185 Petrowski	.25	.80	7.50

## RUTABAGA

Also called Swedes, Swedish Turnips, or Russian Turnips. The roots are more solid, of firmer flesh, and therefore keep later into the spring than turnips. They require about 4 weeks longer to reach maturity. One ounce for 400 feet of drill; 1 to 2 pounds per acre in drills; 3 to 5 pounds per acre broadcast.

**4 ozs. Lb. 10 lbs.**

1191 Improved American Purple-Top Yellow	\$0.25	\$0.70	\$6.50
1192 Bangholm	.20	.55	5.00
1194 Golden Neckless (Burpee)	.20	.55	5.00
1196 White-Fleshed Neckless	.20	.65	6.00
1197 Large White	.20	.60	5.50

## PEPPERS

This is a very important crop in some of the southern sections where the weather remains warm all during the winter. The two varieties offered, Burpee's Chinese Giant and Burpee's Ruby King, are grown to the exclusion of practically all others because of their prolificness, wonderful size, meatiness, and sweetness. One ounce will produce about 1,500 plants. Sow 3 ounces for one acre.

**Oz. 4 ozs. Lb.**

819 Chinese Giant (Burpee)	\$0.65	\$2.00	\$6.50
821 Ruby King (Burpee)	.45	1.30	4.25

## TOMATOES

This crop is grown in practically the same section as peppers. The most popular of the large-fruited varieties are Livingston's Globe and June Pink. Among the smaller fruited ones Gulf State Market and Early Detroit are best known. One ounce of seed will give 3,000 to 4,500 plants. Sow 4 ounces of seed for one acre.

**Oz. 4 ozs. Lb.**

1074 Stone	\$0.30	\$0.90	\$3.00
1068 Gulf State Market	.40	1.15	3.75
1104 Early Detroit	.35	1.00	3.50
1066 Acme	.30	.90	3.00
1067 Livingston's Globe	.35	1.00	3.50
1107 June Pink	.35	1.00	3.20

## SPINACH

Spinach furnishes its rich green, fleshy leaves all during the fall, winter, and early spring. It is sown extensively in the South during September and October for winter use. Sow one ounce for 100 feet of drill; 10 to 12 pounds per acre in drills.

	<b>4 ozs. Lb. 10 lbs.</b>
990 Long Season	\$0.15 \$0.40 \$3.50
991 Victoria (Burpee)	.15 .40 3.50
993 Thick-Leaved Round	.15 .40 3.50
995 Long Standing (Enkhuizen)	.15 .40 3.50
999 Norfolk Savoy-Leaved (Bloomsdale)	.15 .37 3.20
1001 Prickly, or Winter	.15 .50 4.50

## RADISHES

There are three distinct classes of radishes—the spring radishes, the summer radishes, and the winter radishes. The spring radishes mature the quickest, in from 25 to 40 days, depending on the variety and the weather. They develop best during the cool season. One ounce is sufficient for 100 feet of drill; 8 to 10 pounds per acre sown in drills.

	<b>4 ozs. Lb. 10 lbs.</b>
877 Burpee's Earliest Scarlet Button	\$0.30 \$0.85 \$8.00
878 Burpee's Rapid-Red	.35 1.00 9.50
879 Burpee's Hailstone	.25 .75 7.00
880 Non Plus Ultra	.25 .75 7.00
883 Vick's Scarlet Globe	.30 .90 8.50
886 Crimson Giant Globe	.30 .95 9.00
893 Sparkler (Scarlet Turnip White Tip)	.30 .90 8.50

936 Long Cardinal (Brightest Scarlet)	.25 .70 6.50
938 White Icicle	.20 .65 6.00

## Summer Radishes

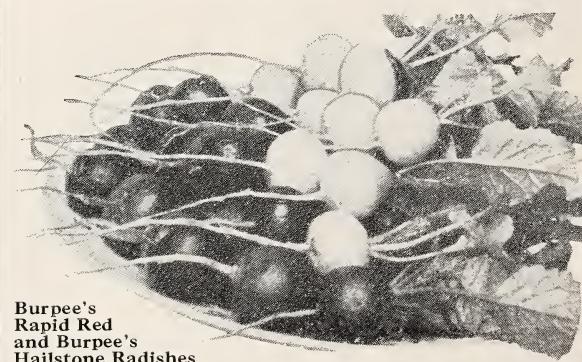

The summer radishes are, in contrast to the spring varieties, adapted for summer sowing even where the weather is quite warm. Make succession sowings to provide a continuous supply of roots. Begin sowing in May and make the succession plantings 1 or 2 weeks apart until August 15. Where the weather is extremely hot during the summer, sowings should be delayed until 3 to 4 weeks before the cool fall weather sets in.

	<b>4 ozs. Lb. 10 lbs.</b>
951 Chartiers, or Shepherd	\$0.25 \$0.75 \$7.00
953 Long White Vienna (Lady Finger)	.30 .85 8.00
959 White Strassburg (Hospital)	.25 .70 6.50

## Winter Radishes

Winter radishes require cool weather at the finish of their growing season, though they may be started during hot weather. Make your first planting during the middle or the latter part of June and sow a second and a third time at intervals of 2 weeks. Winter radishes must grow quickly, particularly as they reach their full size, in order to be crisp and snappy. They are easily stored for winter use in any frost-proof cellar.
